The SIEBELAX_HI_CLIENT.CAB file contains one or more components. SIEBELAX_HI_CLIENT.CAB starts C:\IBM\spsqldb\SQLSERVER_DB_RUNTIME\dot NET\siebel\Siebel\HighInteractivity\C\Sieb.exe/SIEBELAX_HI_CLIENT.CAB/webclien toptionsettings.inf;type=Win10x64 This software product is being licensed to you by International Business Machines Corporation under the terms of the LICENSE. For more information, visit www.ibm.com/jv9i.Q: How to select multiple elements using the same name for the same attribute? I have been trying to make all the s on my page change on hover but I don't seem to be able to get it to work. Every time I hover over a single image the hover is only detected once. Can anyone explain this and help me fix it? A: You can't use the same name for the same attribute. You need unique attribute names. Alternatively, you can use the class attribute instead of the id. Here's a working example: .some-element.img-1,.some-element.img-2,.some-element.img-3 { border: 1px solid red; display: inline-block; height: 100px; width: 100px; } .some-element.img-1:hover,.some-element.img-2:hover,.some-element.img-3:hover { border-color: red; } Cardiac function improves after exercise training during the perioperative period in patients with coronary artery

A standalone client is required. executable) Siebel Application for sending. in Siebel Attachments (using HI). a. Jun 12, 2018 NOTE: This is *NOT* the highest-quality native conversion possible.
