The Internet is filled with all sorts of applications that you could use in order to do various things on your computer. Sleek interface with plenty of tools at hand The application sports a really nice graphical interface, simplistic but easy to navigate and with many tools. It doesn't take long to install, but it does come with a setup that you need to complete before you can actually use the application. Create your own profile You will need to provide the application with your name, gender, height, date of birth and start date for the monitoring. Once you've done that, you can explore all the features inside the application. You can track your exercise and add progress with your cardiovascular workout training and notes if you want. Moreover, there's the option to track your meal plan, add the number of points, meal types or calories per each serving. In addition, you can check out the chart with how much fiber and sugar you've had during one meal. More features and tools You can easily track and visualize progress, know if your diet and workouts are effective, and reach goals faster. It includes a simple journal for recording information and five major tools to view and analyze progress. It also has eleven fitness calculators, an 8,000-food database, 14,000 serving sizes, plus tools to create meal programs, workout programs and your own custom food database. Get Web links and useful resources On top of this, there are five special databases that let you track and manage recipes, grocery lists, favorite Web links, equipment and routes. All in all, Weightmania is designed to motivate you, keep you organized, and make workouts and dieting fun.
