The following list includes the most common causes of visual glitches in the application. The list can be sorted by clicking on the column headings (including the column titled "Sort by Sort Desc"). Causes of visual glitches. Causes of visual glitches. Some of the visual glitches that users might see include the following: items with non-adjustable widths . Many items can be resized. items with non-adjustable heights . Many items can be resized. items with non-adjustable margins . Many items can be resized. items with non-adjustable paddings . Many items can be resized. transparent windows . Some windows' transparency is adjusted to the background color of the window. transparent items . Many items are transparent, including Toolstrip windows, Items in the Track view, and other items. non-transparent controls . Most Windows controls are always opaque. However, some controls might be translucent. For example, Windows' Combo Boxes are always opaque, but they have the option to be translucent for earlier versions. several items without borders . Most items have borders when moved to a different location on the screen. However, some items might not have borders. Many times users encounter this error due to the following issues: Improper settings . Users might have their screensaver settings set to turn their monitors off after a certain number of minutes in order for their monitors not to consume too much energy. Improper file size . Some users can receive this error if they import a Microsoft Excel file with a large number of rows. Improper file type . Users can receive this error if they try to import a file of a type other than the type it was originally created in (for example, a wave file is imported into a song file). Improper filtering . Users can receive this error if they filter the file by a category or subcategory. Improper display order . Users can receive this error if they have an undo action after they have imported a file. Also, they might receive this error if they try to add a song with the same name as a song in the same category or subcategory that was recently imported. Improper file type . This can occur if some file types, such as when importing Portable Document Format (PDF) files, are not handled properly.
