Exif Stats Crack + Activation Code With Keygen [March-2022]

Exif (Exchangeable Image File Format) is a standard for image file format developed in 1988 by Digital Equipment Corporation, Hewlett Packard and Sony. It provides a library of information about an image that can be added to the image. Features: * Get technical information such as focal length and shutter speed * Extract from a RAW file the focal length, shutter speed, exposure compensation, * Useful for camera repair and development *** If you have problems downloading from links on Google Play, you can check your connectivity, cache or try your connection again. For other problems with Google Play, check our Help Center here! *** The following features have been implemented for the new version: -Added initial support for JPG files in the app (although there are bugs). -Added the ability to check the related EXIF data (focal length, aperture, etc.) of a photo taken with the camera. -Added the ability to check EXIF data of a photo taken with other camera apps. -Added the ability to check if a photo is geo-tagged. -Added the ability to search for a photo on Google+ or Facebook and display its details. -Added the ability to take a photo and add a note. -Added some more workarounds for non-standard EXIF data. -Added support for the new SHAREfactory 2.0 method for geo-tagging. -Added support for Android 7.0 (Nougat) and above. -Added ability to delete all temporary images saved in a specific directory. -Added support for Android 6.0 (Marshmallow). -Added support for Android 4.4 KitKat. -Added support for Android 4.3 and below. -Added the ability to check and analyze the RAW file format. -Added a user interface skin (More options). -Added support for Samsung Kies. -Added support for iPhone 5s. -Added support for iOS 10. -Added the ability to share the image URL, the text of the note, and a preview of the note to Facebook and Twitter. -Added the ability to share the image URL, and the text of the note to Google+. -Added the ability to share the image URL to e-mail. -Added the ability to delete the app's cache. -Added the ability to delete the temporary files. -Added the ability to make a series of actions

Exif Stats

Rinzo is a free.NET development tool for working with XML files. It is also an open source project hosted on SourceForge.net. The main purpose of this project is to help you develop applications that deal with XML files using.NET. Rinzo is such an application. It is designed to work with any kind of XML file, such as those created by Word, WordPad, notepad and others. Rinzo can also open MSXML 4.0 and MSXML 3.0 based XML files. Rinzo uses a simple (and fast) parser to read the tags of an XML file and store the information in a simple class. This class can then be used in your own applications. Rinzo is a.NET wrapper around the parser. Rinzo exposes a simple API that you can use to read the information stored in your XML files and to write your own information into your XML files. You can choose whether to write the information into the original XML file, or create a new XML file. You can even create your own XML file format. F... ZoomBrowser is a Web based image browser which allows to zoom into an image using both fingers and mouse. It is very fast and very comfortable. It is easy to use for a fast browsing of web pages. ZoomBrowser is also a remote control and you can control your computer from your mobile device. The program Free PDF Editor allows you to open PDF files, change their size and remove the contents. The program works with any type of PDF files, including those created with Adobe Reader. It is a light program which doesn't take a lot of memory and which has very few configuration options. Photo Epigram is a digital photography software for creating captivating photos. The program can turn photos into artistic masterpieces by adjusting the colors, adding various special effects, changing the background and adding text. The software is designed for ease of use and offers numerous intuitive options.Q: Get a (java) object from MongoDB This is a short version of my problem. My Java code has a connection to a MongoDB database. At a specific time, I would like to access a specific object from the database. I thought about saving this object as a String and then, when I need it, retrieve the String. But the problem is that the database is very big, so I need a good way to keep the String data. Is there a better way to 1d6a3396d6

Exif Stats For PC [2022]

Exif Stats is an application for Exif data retrieval. It can retrieve EXIF data from JPEG, RAW, CR2, CRW, ERF, SRF, DNG, NEF, CRW, DNG, NEF, X3F, SR2, SRF, RAW, NEF, CR2, NEF, DNG, CRW and more.
