assembly checkpoint. All organisms are dependent on the mitotic spindle for accurate chromosome segregation at mitosis and kinetochores (mitotic centromeres) for the presence of mitotic kinetochores and delays anaphase onset	meiosis. The mitotic spindle is composed of microtubules that have polarity, but the	mechanisms of spindle assembly, and particularly the creation and regulation of spind	le microtubules is poorly understood. The spindle assembly checkpoint (SAC) is a survei	llance mechanism that monitors
