Somaclonal variation refers to the variation in plant morphology and vigor resulting from exposure of the plant to the environment. Narrow sense heritability estimated at a single location would be underestimated if the effect of environment on parental traits and traits of interest is not accounted for. Analytical equations and statistics {#Sec5} ----- Analysis of variance (ANOVA) for each trait was performed by means of linear regression models. Broad sense heritability ( $H^2$ ) on a mean performance basis, at a given location, was estimated by means of the following model: 
$$H^2 = \frac{\sigma_g^2}{\sigma_g^2 + \frac{\sigma_{GE}^2}{n_T}}$$
 where  $H^2$  is broad sense heritability,  $\sigma_g^2$  is the genotypic variance,  $\sigma_{GE}^2$  is the genotype-by-environment variance,  $n_T$  is the number of locations.

Lloyd's & Cos., 577 F.2d 975, 991-92 (4th Cir.1978). In the absence of this cautionary language, we cannot say that the district court abused its discretion. See *Laminal v. Krasne*, 583 F.2d at 1069; *Schaedler*, 370 F.2d at 129. Accordingly, the judgment of the district court is 10 AFFIRMED. 1 The agreement of the parties and the district court's memorandum and order indicate that Wolfrey was not paid in full for the periods of time at issue. We note that it is unnecessary for us to decide whether Wolfrey's action was time-barred because we affirm the judgment on grounds other than that it was time-barred 2 The parties dispute whether the district court's finding was clearly erroneous. In light of our result, we need not decide this issue 3 Wolfrey's complaint does not specify which statute she contends Midland violated 4 We express no opinion on whether the amendments were a material alteration or whether they prejudiced Wolfrey 5 We also note that Wolfrey seeks damages for infringement of the '359 patent. We need not decide whether damages may be recovered for infringement of a nonexamined patent, see 35 U.S.C. Sec. 289, because Wolfrey neither pled nor proved that she is the inventor of the '359 patent The effect of prescribing drugs commonly used in palliative care on the serum lipid profile. As the use of drugs in palliative care becomes more common, it is essential that physicians treating patients with life-limiting diseases are aware of e79caf774b

primary device, is it possible to use the depth field feature of an iPhone with an iPad 2? A: Depth of field is something that's specific to a device's camera, and without knowing more specifically which iPhone and iPad you're referring to, I can't really speak to whether depth field will work on either. It is, however, possible for it to work on both. The depth of field feature is not simply a function of camera type, but also of the optics, sensor size and processing chips used. One possible exception is that depth of field is only possible when a camera is in portrait orientation. Q: Is it possible to take photos that give 3D depth effects while the camera is in landscape orientation? A: Yes. The depth effect will show up when the camera is in landscape orientation. Camera types,
