"It's not that Zombie Creator has a quality that is bad (or else I would not recommend it to you) but its design, which combines all the improvements and speed that I am currently experiencing, has a pretty interesting and different approach that is worth trying out. " "Zombie Creator is a platform game, similar to the survival games, where the player has to prevent a wave of zombies from invading the house (a more traditional one that we all know). To achieve this goal, you have to collect items to create weapons, defense systems and offensive items. The game has the action-survival genre, typical graphics, but it has a slightly unusual design. " Reviews PC Magazine "Any old school game can score a great score in this genre, but for the best action and graphics the game Zombie creator makes the cut. Thanks for making it easy for me to enjoy this game, Zombie Creator." Gamezebo "Its classic graphic design, cute set-pieces and a light, fun game make this an experience that will have you screaming for the moon, even if you're bored by zombie games." Gameslat "The gameplay is fun and simple, with rudimentary combat, but enough and challenging at the same time. The graphics and music are simplistic, but they add to the atmosphere of the game." MUZZIN Reviews "The game has a classic feel, is easy to pick up, and fun enough for even a less experienced player. How bad can that be?" Enjoy the Ride "The game is fresh and unique, with a lot of charm, and great art and physics. What more could we ask for?" Gamezebo "Although not of the highest quality, it's still a fun game! This is what we come to expect from action games, and this is what Zombie Creator delivers." Gamezmom "Zombie Creator is a wonderful game! You will not be disappointed with this title, let alone with the trailer that goes with it. Good luck!" Space Pilgrim Episode III: Delta Pavonis (, translit. Staroglačevi put Triumfalna) is a 1988 Macedonian science fiction comedy film directed by Živadin Stojanov. It was Macedonia's second highest-grossing film of that year, behind V.I. Makedonski's comedy film Popište baba Novak. All three films were released simultaneously, with The Wild Flowers of Life coming third. The story revolves around two science students who search for the lost body of their professor, an astronaut who vanished the previous evening. They follow the professor's satellite traces to the planet Sigma Pavonis, where they find his plane, crash-landed and buried in the deserts. In 2008 the film was selected as part of the Macedonian Heritage by the Macedonian Film Institute (MFI) so it could be shown on Z1 TV in the 50th anniversary of the Macedonian film industry. It was the first Serbian and Macedonian film ever nominated for an Oscar in the category of Best Foreign Language Film. Florijan sees two boys with jetpacks who land to help him. He sees their universe-vision projected in the earth's atmosphere. Florijan wakes up and sees how he crashed into Earth and how his pupils have moved out of their universe into the students and millions of humans in the nearby villages, searching for him, and he falls into a heavy feeling, as he has mixed up reality. Florijan proposes to stay on Earth, but the two boys insist on taking him to the planet's center. They find a strange city at the target, indeed, it is the spaceship of the professor.
