The Animator Toolkit The Animator Toolkit is an animation, model animation and motion design tool provided with AutoCAD. It has an interface similar to the animation editor in the former Ulead Animator, including the Layers panel, Timeline, and Timeline buttons. However, this tool was discontinued in the 2007 release, and replaced with the Animator for Autodesk Motion Builder. Autodesk Motion Builder Autodesk Motion Builder is a unified animation, model animation and motion design tool provided with AutoCAD. It has an interface similar to the animation editor in the former Ulead Animator, including the Layers panel, Timeline, and Timeline buttons. Both Autodesk Motion Builder and Autodesk MotionBuilder (previously Autodesk Animator for Autodesk Motion Builder) are not actual Autodesk products. They are third-party programs offered by Autodesk's customers. Autodesk does not develop or market Motion Builder, nor sell it, nor contribute to its development. These are third-party products offered only to Autodesk customers. Geometry tools The geometry tools include: Coordinate geometry tools: X, Y, Z coordinates Transformation geometry tools: Axes and transform Perspective geometry tools: Active View and history Distance geometry tools: Distance to and intersection with Plane geometry tools: Planes Snap to Vector geometry tools: Vector edges, loops, and fills Align geometry tools: Align two objects Align an object to a plane Align with a point Align with another object Align and snap Text tools: Text Font and size Rotation tools: Rotate Scale Polyline tools: Polyline vertices Line Polyline operations Move Wire Line and arc Arc Loop Join Splice Rasterize tools: Rasterize Pen Rasterize and export to vector Objects and filters Shape Filters: Polyline Ellipse Rectangle Circle Line Arc Spline Polyline (duplicated) Text Multipatch Line, arrow, and arrowhead Align Arc Bevel Caps and bottom Composite Join Cylinder Select Rectangle Round Spline

Choose from five different tools for scanning drawings. Select from one of our four scanning options and our patented scan tool, which captures the surface of a drawing and enables you to quickly save or import it into a digital design. Turn paper or electronic drawings into sketches using the Adaptive Architecture™ Sketch feature. Revit workflow to work with AutoCAD using Revit Revit 2018 adds an impressive workflow that makes the process of creating, editing, organizing, collaborating, and sharing all types of design, architectural, and construction documents much easier. In AutoCAD, we've incorporated that workflow into AutoCAD Architecture. Use the new Search feature to search for any word or symbol within drawings, not just within a specific project. Experience AutoCAD Architecture with a click, including importing and exporting to Revit, placing and detailing commands, rendering options, and more. (video: 1:30 min.) This is only a brief summary of the new features available in AutoCAD 2023. For more information, review the full AutoCAD 2023 features in this blog post. Useful links to learn more: What's new in AutoCAD for Architecture for printing and drawing tools Fast, intelligent workflow for professional drafting Add dimensioning to any surface, or even create freehand linear dimensions with a simple click and drag. Select a wall surface or height and click Add Dimension. Integrate dimensions with walls, areas, surfaces, and vertical elements to complete your design in one step. You can even align your dimensions with the grid in your drawing. Set properties of dimensions that apply to specific areas of your design, or even change properties based on different regions within the same drawing. Add text to any surface in your drawing, or even create freehand outlines using simple clicks and drags. The "Add Text" command enables you to choose any text font, size, and color to create crisp, clean text. Use this command to insert text at any location within your drawing, but also to generate overlapping text, shadow text, and more. Place two or more text boxes at the same location to generate a single text box with a dynamic name that automatically updates when you change the position of the box. Draw text-based lines, circles, ellipses, polylines, and arrows. Add color
