The game features multiple parts. AI controlled traders offer you some basic help. It also features a single player campaign where you will challenge yourself. Not forgetting AI enemys also waiting for you. In addition you will have two bots: Coopbot and Bounty Hunter Bot. Both bots can be controlled separately from each other, allowing you to have teammates.Coopbot offers some basic help: it can repair a certain number of ships and it also features a repair scanner that will reveal what can be repaired in a given area. If the ships is repaired the bounty hunter will track your target and attempt to hunt down the target. However, it doesn't work perfectly, and the bounty hunter has no armaments. The bounty hunter can be controlled without using the keyboard, so you can even play on a keyboard. Once the bounty is tracked a bounty ship will jump to your position. It will stop if it sees any enemies or other ships.The bounty hunter includes a repair ship that can repair ships for a price. The repair scanner and repair ship can be used to detect what is in a certain area. An alien visual scanner is also included that will be used to scan an area to reveal what an alien or other caracter might be. The game also features a two player mode. What is also unique is that you can play different modes against each other.There is a race mode in which you control a human being and you attempt to get to specific planets and keep them safe as long as you can. Use your scanners to help you with this. A star map is also available, where you can see the planets that are safe. You can use your bounty ship to scan and reveal the dangers of the area. Finally you can use the repair ship to repair the ships that has been attacked by the enemy. The race mode is not over, the fights are real. Use the different ships and weapons to defeat your opponents.The second game mode involves randomly generated maps. The goal is to control all enemy spaceships. Use the bounty ship to repair your ships that are attacked by the enemies and board their spaceships as well. Use your repair ship to provide a certain amount of protection.Gain weapons and armaments. Just when you think you have everything you need, think again.
