Rb\*-iLSP caused by the genetic separation from the parent strain may reflect genetic instability. Our cytogenetic analysis revealed that the chromosome 16 and the chromosomes 17 appeared to be more susceptible to chromosome aberration formation than the other chromosomes in SC139-Rb\*-iLSP. These results indicate that Rb\*-iLSP is genetically unstable and less stable than the parent strain, SC139. Furthermore, chromosome 16 was also more stable in SC621-Rb\*-iLSP, suggesting that there is a chromosome 7 sequence in chromosome 16 that contributes to the stability of the chromosome 16. In SC679-Rb\*-i
