It's a destiny which ticked away in my father's family, ticking away just a little bigger with each generation. It was not to be so for me. I was catapulted into a dimension of grace and light, a reality which could not be more different from the realities of my other 3 siblings. Life ought to be fair, but if you don't grow up, you never know... As Boethia knew nothing of his heritage, he took the one step away from his doom and set out to reach the place of his dreams. He faced every peril and survived; the book and teachings of Maat were his saviour. Watcher was born in this world, reborn in another, embraced in both by the one he loved above all else: Tristy. There are people out there that call my family monstrous, but I don't think that's fair to them: we're just a family. We have no special talents, no special powers, no place other people would envy. We have different hearts and we share the love of gods, and that's all, really. And the world that's been so cruel to us, has kept us in check. After Tristy died in a car accident - it should have been her that was the killing; she had her whole life ahead of her - life went on, just a little bit more. Dimension is the offspring of my darling Tristy and something dark beyond reckoning, a dark heart turned puppet and abuser; something twisted and obscene

{ "reviews": { { "body": "This game was everything I hoped it would be and more! For a long time I have been a huge fan of \"Hidden Object\" games, and I've played plenty, and I've enjoyed them very much. But with this game, Dark Dimensions: Homecoming, I found something that I had never experienced in a Hidden Object game before: a homecoming! Yes, a homecoming of sorts, which is different from other games in the genre. This game is unlike any Hidden Object game I have ever played in terms of plot, gameplay, level design, mini-games, graphics, sound, music, etc. From start to finish, this game is everything I hoped it would be and more! To top it off, I loved every second of it, I didn't want it to ever end. Dark Dimensions: Homecoming is the kind of game that I would highly recommend to any Hidden Object player, regardless of whether you're a fan of this genre or not. It is everything it should be and more. The gameplay is fast-paced, as you'll be solving puzzles and advancing the story within minutes. In addition, the gameplay is challenging, giving you a challenge from beginning to end and offering lots of fun, memorable moments to help you succeed. The plot is a great idea, with a storyline that plays out in real time, making for a very realistic experience. The character and scenery are all beautiful, and I was really impressed with the graphics and sound in this game. The variety of puzzles is very high, offering you something to do for every minute of gameplay. The mini-games add another challenge to the gameplay, and they are also fun and challenging. The added game modes add another level of fun to this game, which makes for a very unique game experience. I enjoyed Dark Dimensions: Homecoming so much, and I couldn't recommend it enough to anyone looking for a new Hidden Object experience!
