Court of Appeals of the State of Georgia October 15, 2017 The Court of Appeals hereby passes the following order: A18A0348. YODI SIX v. THE STATE. In this forfeiture proceeding, Yodi Six was convicted of trafficking in marijuana. Latest Games - Pirates of Skull Island .Blowing Her Own Horn A Comedy of Musicians Saturday, May 5, 2013, 7pm BATS Theatre Chicago has no shortage of local comedy. From the cheap roadhouse to the brand name comedy club, new and established comics routinely put on entertaining shows. What separates one series from another is quality and consistency. Who knows why. But the name for these shows is clear, and you can see them on the marquee. In The Blowing Her Own Horn, nine of Chicago's talented female comics step up and perform. The show was generously presented by the Comedy Place and is worth seeing, even if you've seen all of the performers at one of their other shows. Comedians who have appeared on the show's current cast include Meredith Salenger, Emily Love, Wendy Walsh, Ardenll Silberg, Emily Lewis, Kate Colburn, Ann Kempthorne and Karen Harvey. All do good work. The packed program moves through the usual bits, from imitations of phonies to one-liners about dancing, but manages to include a good number of one-liners, as well. The always-solid Emily Love is among the best and has the funniest lines in the show. Speaking of funny, if you find that the comics tend to one-liner themselves (which is how Kate Colburn runs most of her set), you may lose interest in a show where Emily does well. Meredith Salenger has a good clean line. Wendy Walsh has a natural delivery and creates a dialogue she can both deliver and listen to. While the show has nearly a half-hour of material, there is plenty of room to play for a non-comedy audience d0c515b9f4

Field of the Invention The present invention relates to a method for controlling voltage of a secondary battery pack. 2. Description of the Related Art Recently, as the function and price of digital cameras, cellular phones, and notebook personal computers have become enhanced and diversified, there is a growing demand for a compact and lightweight, secondary battery pack which is incorporated in the aforementioned electronic devices. In order to overcome the above drawbacks, a lithium ion secondary battery pack has been developed. The lithium ion secondary battery pack has a high energy density and high capacity so that a compact and lightweight lithium ion secondary battery pack can be realized. However, when the lithium ion secondary battery pack having the above configuration is used for a long period of time, the lithium ion secondary battery pack tends to suffer from low capacity. To overcome this drawback, a method for increasing voltage during the operation of the lithium ion secondary battery pack has been suggested. However, since the lithium ion secondary battery pack is adversely affected by high voltage, there is a problem that the lithium ion secondary battery pack does not exhibit a sufficient capacity even when the method is applied. Accordingly, a need exists for a method for effectively increasing the capacity of a secondary battery pack while alleviating the
