Q: Proving  $\sum_{n=1}^{\infty} \frac{1}{n!}$  converges via Comparison Test I've been struggling for quite a while with the following task. Show that  $\sum_{n=1}^{\infty} \frac{1}{n!}$  converges by using the Comparison test. My attempt: 
$$\begin{aligned} \sum_{n=1}^{\infty} \frac{1}{n!} &= \frac{1}{1!} + \frac{1}{2!} + \dots + \frac{1}{n!} + \dots \\ &= 1 + \frac{1}{1!} + \frac{1}{2!} + \dots + \frac{1}{n!} + \dots \end{aligned}$$
 
$$\frac{1}{k!} \end{aligned}$$
 However, I am not sure this is right since we did not use the result that  $\sum_{k=1}^{\infty} \frac{1}{k!}$  converges. Is my attempted solution correct? Does the Comparison Test always provide us with a proof for a general result since I have not used any special result? A: Yes, your solution is correct. To give you an idea, the easiest way to proceed is to realize that, because of the factorial, the ratio of

**Upon By Enchanting The Sacred Oak Aurilia Morningstar Returns ARIANA "Not so strong as to be unable of love, nor so brave as to be unaware of fear, can any human, be divine." —EDWARD RICKERT The monastery is a quiet stronghold. It sits atop a hill that rises above the treetops of the surrounding forest. It lies within a forest of chestnut trees and a willow forest. The monastery is built on a hill because one day the future duchess rode up on a horse and demanded that the monks teach her how to learn more sorcery from the elders of the area. She battled many beasts and she battled many Wizards. And, all the while, only one of the Dukes that stood against her... fell. She had fought at his side for nigh two years, but he still stood against her army. Eventually, he had tired of her. Her victory was total, and the Dukes retreated, shamed. The Dukes vacated the region in a rush. She, on the other hand, was intrigued. She was a fighting young woman with a half-troll father, and he had a weakness for sorcery. She stormed into the monastery of the outcast sorcerer and demanded he teach her all**

**there was to learn about magic and sorcery! Not so much as a caster or Elder drew near to her, but eventually, one of the monks who was not scared by her exploits, agreed to teach her what he knew. She learned sorcery and it was well. Her tactics and the style of sorcery she used were ancient and warped and honored. This was soul sorcery: enchanting the undead. An Elder, the old Sorcerer, taught her the ways of minor-witching. Minor, as it had been on the timeline that he opened his door and her, was known as the back hallway of Houdini-ology. Houdini-ology came from Houdini, whom was a person from this timeline who traveled down to the future trying to ensure all known future events. The Elder was a powerful sorcerer and a weird mix of magic, but he couldn't peer inside a wyrm and talk to the savage cunning of it. Actually, the Old Sorcerer, though a powerful sorcerer was, almost said, a bore. She would discover no more than fifty-three different ways to deal with a wyrm, but she discovered most of them.**
