Good User Interface Sample Applications -- -- Poi is a free cross platform multi-language string handling library that can convert Unicode text (UTF-8) into human readable ASCII text. Poi is designed to be light, lean, and easy to use. Poi is compatible with ASCII text, UTF-8 Unicode text and in recent versions, all the other Unicode encodings. Poi can be used to convert single bytes, strings, complete lines, or complete documents. Poi uses UTF-16 internally and with UTF-8 encodings. UTF-16 is a more human readable form of UTF-8 which should be used if text can be in UTF-8 encoded text. Poi is based on UTF-16 which can be used for all applications as it is an endianess independent encoding. Poi has no dependencies and is just a framework. A multi-language library can be included at compile-time. This means that Poi can be used as a general string handling library and also as a multi-language library. Poi is optimized to support all platforms, including all Windows, OSX, Linux and iOS. Poi can handle more than 2 trillion characters. Poi can also be downloaded from Poi Specifications: * Compatible with Unicode, Unicode with byte string / arbitrary string / custom string. * For unicode text, UTF-8 can be supported. * Not limited to any language. * All string types are supported. * UTF-16-LE, UTF-16-BE, UTF-32-LE, UTF-32-BE. * Multi byte encoding is supported: UTF-16, UTF-32, CP-437, CP-850.
