Features Key:

A highly immersive battle system Based on item-based skills that differ from attacks in that they are not typically chained into an automatic sequence, a system that relies on a player's own actions allows a very fluid and exciting feel. In this system, a player's choices determine the fate of battles. ZiTO's unique character growth feature A system that gradually and automatically increases your character's abilities and attributes has been made. Not only does it increase the amount of power that you can use, but it also makes battles an immersive, fun, and exciting experience. Although passive, it also gives a sense of progression that is not felt in previous games that featured similar abilities.

A custom feature that easily lets you become your character's truest self Items can be equipped and manipulated in a variety of ways, while there is no restriction on the character's movements. The freedom and versatility of this feature mean that you can experience many different possibilities in battle.

An advanced AI system that creates an ever-adapting and seamless battle experience This system provides a unique AI that can understand situations and act in ways that take advantage of the strengths of your actions. When you attack an ally, this AI can prioritize that ally, recovering more quickly than opponents.

The 10-player Booster Destruction Battle system lets you decide victory and defeat. The system has a powerful intuitive UI, and new battle tactics have been added. It also features a new player unlocking system and battle rewards, and lets you freely cross-link with other players in other locations.

A constant and enjoyable quest experience In addition to the items you can collect and weapon and armor upgrades that you can obtain through opening the Gate Tarnished, defeating enemies, and collecting items, rewards and bonuses will be constantly provided, and the number of stages for each quest will increase. Furthermore, if you proceed in the main story after starting the initial quest, the difficulty will increase. Development continues, and the game will not be released without the main story being completed.
