However, when I run this command from Python (2.7) using subprocess.Popen() it doesn't work. It appears to be a shell issue. file=open(subprocess.Popen(['adb','shell','settings','getglobal','amoleduty'], stdout=subprocess.PIPE).communicate()[0].decode('utf-8').strip()) I've looked

Elden Ring Features Key:

Awakening of Mythical Power Equipped with the rare and mysterious Power of the Myth Dragon, you become a strange abomination. Only by fusing your life and the life of your prey, can you link yourself to the ancient, multilayered history which casts its shadow over the Lands Between.
Adventurous Adventure You are joined by a full array of monsters and story through deadly dungeons, lush fields, and a world full of mysteries. You can attack enemies with your familiar companions, or simply disappear into the expansive Elden lands.
Job System You can freely choose your job to suit your personality and play style. Only through this, can you overcome the Elden guardians and reach a new level of exploration.
Focus on Random Chance In order to avoid monotony, the game uses monsters that have a certain level of rarity. By overcoming them, you can gain a variety of statistics and acquire useful items.

Key Features of the Elden Ring version:

- Unique Online Play that Loosely Connects You to Others
A unique online element is supported by combining a number of open worlds. By boldly exploring in the game, you can meet other players.
- New Character Development System
You can freely develop the appearance, status, and stats of your character. By developing your character according to your play style, you can become a strong warrior or magic-user.
- Opening new Scenes in the Lands Between
In addition to the normal quest, you can explore the Lands Between by new scenes.
- Variety of Equipable Weapons
