## Gameplay Features

As a high-speed duel game, the most important distinction is the proficiency of the GIGA's Fast-Fire GUEM system. This

system speeds up all the actions by adding a character's attributes as time passes. As a result, it was named the fastest gear-up and depreciation system on the market.

This system also determines the breaking point of the judgment of the opponent's actions, and adds additional judgment for more uncertain actions. More importantly, when your character loses points through being hit, this adds the characteristic effect that once again gives you back your lost points when you win again. In this way, it is possible to quickly build up a shield barrier—the back-and-forth swing of the sword is the decisive factor of the battle.

You can now enjoy the unstable combat scene between many players with a 1v1 system.

For PvP (Players vs. Players), you can challenge rival players through ranked PVP in two modes.

- I. "Main Arena"
- II. "Nebulas Arena"

In the Main Arena, there are three modes for a variety of types of PVP that can be selected.

In Nebulas Arena, there are two types of modes:

- ★The Contested PvP Area (CN)★
- ★Contested PvP Area (WN)

GameSpot "With its fair share of hacking and slashing, more customization and an overall high degree of polish, Elden Ring Cracked Accounts is the definitive fantasy JRPG that has been in the making. While its flashy look hides some flaws in the loading times and combat, the game provides hours of entertainment for hardcore RPG fans."

GamesInformer.com "If there is one thing that the Elder Scrolls series has proven in the last decade, it's that the RPG formula can be enjoyable at any price. That the Elder Scrolls: Legends has come out at \$15.00 is a minor surprise, since the full-fledged Elder Scrolls V: Skyrim on PlayStation 4 retails for \$60.00, and with Elder Scrolls Online fans have paid upwards of \$20.00 for ESO. That said, for \$15.00 I can't think of much else I'd rather spend \$15.00 on other than this game or Marvel vs. Capcom Infinite." Pocketgamer.com "Elder Scrolls Legends blends the best bits of collectible card games (CCGs), free-to-play games, and the entire array of turn-based roleplaying we've come to love with over the past 30 years, and it's doing so in a really cool way. The fun combat can be a little unfocused, but as long as you're willing to sink some time into the card game, there's a lot to like here." GamesRevolt "Elder Scrolls Legends is a card game I've been looking forward to for some time, and at \$15.00, it's a pretty good deal too. You could be on board for as little as a couple of hours, and you could be on board for as long as two or three months. In fact, it's almost more about that than the game itself, it's just as much about the fact that you can get so far in the game for so little money. The cards themselves are easy to understand and easy to use, and there's a good community of players. I'm impressed." GamesRadar "If you want a turn-based, card-draft style RPG, then the Elder Scrolls series is the ideal choice. Legends is the best port of them all to a digital format, and if you've never tried it before or have been wanting to check it out, Legends is well worth a go." IGP.net bff6bb2d33
