Adventuring Animals is a fantasy ruleset designed for miniature wargames. Adventuring Animals is the second in a series of 4 rulesets. Adventuring Animals: This ruleset is ideal for a fast-paced fantasy game which focuses on the adventures of a group of characters who come together to work together to defeat various threats. Adventuring Animals is designed to be easy to learn, but well thought out and easy to use. If you are using the Fantasy Grounds Leveler, you must import your own maps and battle maps for this ruleset. It does not work with the Fantasy Grounds Market Place. FEATURES: Lots of new animals to choose from: Fierce and Intelligent Animals Animals with Cool and Unique Appearance: Animal Pawns and Animals with a Guild: Customizable Animal Appearance: Dynamic Animal Faction (Faction of the Animal is chosen randomly with a Special Attack Die roll and can be any of the 4 Factions as outlined in the ruleset) Fast and Easy to Play: Quick Start Guide with a detailed Player's Handbook: Weapon Skill system: Big Animals: Customizable Animal Weapon Tactics: Allied Animals: Equipment for Animals: Animals are up to 200x200mm: Base Animals: Adventure Animals: An Adventure is supposed to be a series of adventures set in a campaign setting over a number of years, with a beginning, a middle and an end: Battles are fun and easy: All Things Monster and Monsters make a great tabletop campaign: In-depth rules with a focus on the character and not on how they play the game: Small Game Size: Animals are easy to learn and to play: Mission, Combat and Adventure Game Master Role: All Things Part of a Story: Scenic Map Types: Battle Map Types: Playing Time: < 5 hours: < 25 hours: < 50 hours: < 100 hours: &

In order to add a particle aggregate suspension to a tire ply, the particle aggregate suspension is ground to a fineness of about 10 m.sup.2 /sec. and is then passed through a metering apparatus consisting of a blade, pressing rollers, and a suction duct. With this prior method, the thickener added to the particle aggregate suspension having a very low viscosity tends to clog the apparatus. Furthermore, the amount of thickener added is not adequate. Consequently, the desired chemical resistance is not maintained in the finished tire.#ifndef CAFFE_TANH_LAYER_HPP_ #define CAFFE_TANH_LAYER_HPP_ #include #include "caffe/blob.hpp" #include "caffe/layer.hpp" #include "caffe/proto/caffe.pb.h" #include "caffe/layers/neuron_layer.hpp" namespace caffe { /** * @brief TanH function * @param bottom input Blob vector (length 1) * -# @f$ (N \times C \times H \times W) @f$ * the inputs * @param top output Blob vector (length 1) * -# @f$ (N \times C \times H
