“HyperMotion Technology offers gameplay that perfectly replicates the complexity of the real sport,” said David Rutter, Executive Vice President of Product Development at EA SPORTS. “For the first time, players will feel like they’re playing against the physical limitations of the real man. For example, don’t be surprised if players possess an uncanny ability to pull off tricky-angled last-ditch tackles.” The core of the game will be a single-player experience with new characters, locations, and multiplayer options as part of the online service. It will also include FIFA Ultimate Team, a card-based game mode focused on solo play or competitive multiplayer, as well as Career Mode, where fans can create a personalized player and manage their progress through leagues around the world. FIFA 22 will be available worldwide on PlayStation®4, Xbox One and Windows PC, on September 27, 2017. It will be available as a digital download on the Nintendo Switch on September 20, 2017. PLAY FIFA 22 will deliver new ways to play. “Zoom” technology, first introduced in FIFA 17, has now been perfected. It includes contextual AI-powered decisions with AI rival players, meaning that opponents react in real time to what the player is doing on the pitch. The tutorial system has also been improved. After playing a full match against AI-controlled opponents, players can now make minor corrections to build skills that are instantly available. Improvements are also made to goal kicks, free kicks and throw-ins. Throwing the ball will be even easier with the implementation of a new “nudge” system, giving referees greater control over the ball. “Movement” is also improved, meaning players are more agile as they anticipate your next move. Players will move even more naturally, making every decision the right one. Players are more aggressive and play better in tight spaces. To add a further layer of authenticity, “Squad Battles” have been added, allowing players to take on the legendary names of the history of football as FIFA 20 World Cup Brazil rivals Lionel Messi, Xavi and Iniesta for the first time. FIFA 22 will feature the new “referee camera”, which will provide an expansive view of the pitch from multiple angles. FIFA Ultimate Team FIFA Ultimate Team is a brand-
