Watch the video above for more info on what they've added! Although conceptually similar to the Smart Player System introduced in FIFA 17, the HyperMotion Technology (HMT) uses real-life input to drive certain features of the in-game player model. For example, players should "feel" as if they are controlling real-life players in the game. Although the mode will be available with their base game and Ultimate Team, there will be no gameplay footage of the HMT mode available in the video preview. However, we will have a dedicated post with a hands-on presentation at E3 and on this website shortly! Today we are taking a look at Fifa 22 Product Key's HMT technology, which uses real-life data to boost the in-game player model. This is an interesting addition that is sure to offer some major improvements over the default player model, especially for casual gamers, and can make the player feel as if they are playing on the pitch. If you'd like to find out more about FIFA 22's HMT in this video preview, watch the video above or read the following. What is HyperMotion Technology? A motion capture system, or motion-capture system, is used to track and record movement and position of real players on a football pitch. The data collected from player movement is used to create a model of the player in the video game. Currently, the in-game player model is controlled by animations that have been used to model the player. For instance, running is controlled by using animations that model player movements and player actions, and the player model at launch will feature running in the same way as the default player model. Although the player model is created using real player data, the player animations themselves remain the same. In other words, the player models look real, but the animation is adjusted to match what is seen in the in-game player. This, of course, is a limitation that was present in the in-game player models of earlier FIFA games and is something that is going to change in FIFA 22 with the HMT. What is the

HyperMotion Technology (HMT)? Whereas the player model that is created from the data collected by the game engine is static, the actual player model that the player sees on the pitch is dynamic. This dynamic character will have a greater range of movement than the default player model, which

FIFA is one of the most popular sports game series on the planet. It has so far sold over 100 million copies worldwide. FIFA is our take on football. This includes the official laws of the game, of course, but also every other rule about how the game is played. FIFA Soccer 19 FIFA 20 FIFA 19 FIFA 18 FIFA 17 FIFA 2016 How does it work? In FIFA, you get to control a character – either a real player, or one of many fictional footballers. This creates an intimate connection to the sport. Players kick the ball in real life, and you kick the ball with them. You train using the same techniques as real players, and you score goals in the same way as real players. You also master the same tactics as real players – in the same way as the real players. You’ll have to practise and train to master the game. How does the game look? You control a playable character with a controller. Your player is shown onscreen, so you can see where they are on the pitch. When you do things like passing and shooting, the game shows you exactly where the ball is going to go and where your character is going to be. The ball also goes in a realistic way, and the ball animation is smooth. Everything feels right. How does the game play? The beauty of FIFA is that every single feature is designed to be accessible. When you begin your career, you’ll work your way up from the local club to the national team. You’ll also get to play games online, which will take you to foreign venues, as you move up from local games to international tournaments. And whenever you play, you can pick a team and a rival to play against. That means that no matter how good you are, no matter what league you’re playing in, you’ll always get the chance to play against the world. **PLAY YOUR WAY** Pick a team and a rival Pick your favourite methods of play and tactics for training Hone your skills and unlock more-effective moves Choose your favourite playmaker and your goalkeeper Play how you want Shoot, pass and dribble as you control every aspect of the game Pick your favourite playmaker and your goalkeeper Play how you want Shoot
