Why isnt this working? A: Try this regex: /^(http:\\/\)?(www\.)?(#.\*?)(.+?)\$/gm. Although most of these extensions seem to be working, they only work if you use one single file (so I'm assuming that you're using the raw form). Also, they are limited to 5MB long files, which is probably fine for this, but there might be a length limitation in some cases. And they need to be put into a.js file for them to work. SERVICES We can handle any area of accounting in-house or outsource. We are also more than happy to work with your current accounting service provider to adjust bookkeeping information to reflect your decision to maintain or not maintain your present service provider. We can help you change to a new service or a different service provider. Just tell us what you want us to do and we will do the rest, from developing a plan of action to making the changes happen. We can look at your payroll system or we can help you set up or adjust your payroll system so that it is always up-to-date and accurate.
