What's new:

M.E.A.T. RPG is a mainframe, text-based, tactical role-playing game developed by Great Scott Games. It is the first RPG to be developed on the Microsoft Windows platform, and also the first mainframe RPG available on Windows. The game world is made up of hexagonal tiles, which are arranged in a physically-sized hex map and can be moved about to create new hexes. While the game's moves and turns are grid-based, the player characters are free to walk anywhere on the board and have a full set of five attributes. The game features a simple combat system, inspired by Infinity Engine games. The game was originally released as an optional module for the Dungeon Master III program (housed on the Witch's Brew downloads site). On April 24, 2008, the game was finally released on Steam, where an updated edition is available. M.E.A.T. RPG was the basis of the sequel, M.E.A.T. RPG: Chainz. Gameplay The game's game world is made up of hexagonal tiles, which are arranged in a hex map. The center area of the hex map is called the "Hex Space." The hex map can be resized in any given direction, and each tile can move around both horizontally and vertically, including through other tiles. Certain tiles can "teleport" other tiles, making it possible to move large numbers of tiles together. In the center of the Hex Space is the player character's "base." The base can be moved anywhere on the map and can be used to move a character anywhere else on the map. Like other tiles, the base can be resized in any direction. The gameplay takes place on the hex map. The character begins the game with a fixed set of equipment (physical items), which cannot be changed from level to level. Most weapons are based around generalism with a short range. This can be anything from axes to arrows to bombs to fish. The character's skill sets are decided at level creation, and these skills reflect both the character's equipment and the type of terrain in which the character is adventuring. Combat style The combat is a turn-based 2D grid-based system. A player can take up to 5 turns during combat. Each turn consists of a battle phase as well as a move phase. The player takes their turn, and can perform one or more action during the battle phase. Types of

Sarah Silverman thinks Hillary Clinton is 'exhausting to watch.' (Kena Betancur/Getty) Sarah Silverman thinks Hillary Clinton is "exhausting" to watch, and not only does this mean she isn't a proper feminist: "Exhausting to watch" is a funny thing to say about your candidate. — Sarah Silverman (@SarahKSilverman) August 29, 2016 Later, Silverman went on Twitter to explain why she thinks Clinton is "so exhausting to watch": While we want to give Silverman the benefit of the doubt, it's hard not to see this as Hillary-baiting, and it's unfortunate that she would throw her support behind an open, empathetic opponent. It's not like Clinton has all the goals and expectations Silverman feels should be placed on her; most Americans don't. This is the about-face Silverman has made on politics. In 2007, during her run for Senate in Massachusetts, she tweeted this: Last year, she called the conservative line on immigration "unacceptable," and it's far from clear how long she would have stayed on "a liberal razor": Hillary Clinton is the overwhelming favorite to be the next president
