Q: Putting python data into a clustered heatmap I have data that I am trying to cluster into 5 categories, and I have some code in python to produce the map. The map is plot below as a heatmap. My question is, how can I get the heatmap to be clustered by the categories in my data list? Here's the code that I'm using to generate the map. This is one-dimensional clustering, as opposed to for example DBSCAN clustering import matplotlib.pyplot as plt import numpy as np import pylab as p x = [[0,0,0,0,0], [1,0,0,0,0], [0,1,0,1,0], [1,0,1,0,1], [0,0,0,0,0], [0,0,0,0,0], [0,0,0,0,0], [0,0,0,0,0], [0,0,0,0,0], [0,0,0,0,0], [0,0,0,0,0], [0,1,0,0,0], [0,0,0,0,0]] labels = ["Reference: 0","Reference: 1","Reference: 2","Reference: 3","Reference: 4","Reference: 5","Reference: 6","Reference: 7","Reference: 8","Reference: 9","Reference: 10","Reference: 11","Reference: 12","

FIGHT Transcend time and feel the power of the Elden Ring! Explore the Lands Between on foot or mount, with ease of movement and action. Battle larger-than-life bosses with diverse techniques, and get rewarded for your actions. Battle against other players and team up with other adventurers. Players Explore the Lands Between with Tarnished There are many lands in the Lands Between. In these lands, adventurers can find a variety of quests, for example, fighting the demon king of the underworld, or aiding a beautiful princess from another world. Players can also find items or weapons that can be used to create a different character. At the end of each quest, an NPC will appear in the adventurer's village, where the user can equip the dropped items or weapons on their character. If the character is being attacked, players can select a corresponding role to fight the attack. Depending on the success of the attack, players can either be awarded or receive EXP. By accumulating EXP, players can level up their characters, purchasing unique items from the NPC. The Combat System: You can Transcend TIME! Time flows forwards in the Lands Between, and if you defeat an enemy, you will return to the present. In the combat system, you can wait for the perfect moment to use an effective attack. To help players better select the appropriate moment, we added the "Time Wasting" system, which enables players to use a wide range of skills while waiting for the perfect time to use them. For example, if the character has enough Strength and Magic, they can use the Time Wasting ability to destroy a trap or create a weapon, which will be useful for a different quest in the future. If the character doesn't have enough Strength or Magic, they can use Time Wasting to pick up additional EXP or items in order to level up. The Time Wasting feature is different from the existing skill system, which gives you a chance to use an automatic skill at the cost of EXP and time, and this can lead to undesirable situations if a player repeatedly uses a skill that is not appropriate for the battle. For this reason, Time Wasting was implemented in the combat

system to avoid this situation. When using a Time Wasting ability, the use and activation of each ability are indicated on the game screen in real-time. Players can select which skills they would like to use before the battle begins. THE NEW FANTASY

Crack Screenshot ScreenshotsIn the first of a two-part season opener on Thursday, the Dallas Cowboys took on the San Francisco 49ers in a battle that pitted former teammates Tony Romo and Colin Kaepernick against each other. While the matchup was certainly anticipated, one big surprise came in the form of Golden Tate. After being traded to the 49ers in August, the former Detroit Lions wide receiver appeared in the preseason opener, but was used sparingly, with only four catches for 44 yards. But in week one, Tate had five catches for 91 yards, and the two of them had some back-and-forth jabs going in the post-game locker room. "That was a good game for me, that was my first game with this team. I'm very happy to be back here," Tate said. With a lot of former teammates and head coaches on hand, it's no surprise Tate was in good spirits with his former teammates. His latest jabs at Romo were limited in the locker room and even after the game, as he shared a few more jabs at Romo before joining the Cowboys in full uniform, and one other veteran receiver in Dez Bryant. "The D-backs are very aggressive. They wanted to get in your head. I couldn't tell you what happened," Tate said. "I just looked back at Romo and I said, 'I wish I could have gone to the bathroom.'" Romo had a similar story, but nothing major. He told ESPN's Lisa Salters that he wished he could have gone to the restroom before the game. "I have to make sure. I always have to make sure I have to make sure that I'm good," Romo said. "There were moments throughout the game that I didn't have a full anaerobic flow, the bladders didn

Q: How to pin only one type of file in Android (when there are many) to SD Card I know that this question has been asked before, but most of the solutions are outdated and do not work for Android 6 and newer. Here is my situation: A simple Android project which adds a few images to the SD card. The issue: No matter what I set the path, it always adds other unsupported types of files too. I have already created an APK with a different path for the images, and tested it directly in my phone. It works perfectly fine. This means that my APKs do not have the correct filename in it, which makes it a mess. Here is what I got done so far. Manifest file:
