Hi, it is Game Base. Here is the first game we have been producing, we are not sure this is the correct way to help introduction of our new game. Anyway, it is time to **battle against Holly** (our creator) with 4 playing cards and a pistol.

Let's have a single round, first the player chooses a card.

One card is your cards, another one is the **enemy's deck** (Holly's deck in our case)

Another card is the **card to shoot** (the pistol is optional, in this game we just assume there is a pistol, but if you don't like it, you can do away with it by playing a card that can shoot the pistol, or play a pistol suit).

Now, both cards put together, side by side with the other two. And we'll see who has the

Aftermoor is a story driven metroidvania game where a young man wakes up dead and must battle his way through five interactive levels to find out what happened to him. Each level is set in a different location and should take on average 2 to 3 hours to play through, with possibilities for replay and experimentation. You must strategically ride out in-game challenges and you can always come back later to revisit levels. Fringe Science is a family-friendly, virtual reality (VR) experience. The player is invited to explore the environs of a research facility, and can travel almost anywhere within the game through manipulation of the various elements that comprise the environment. Playing as a character named Mainframe, the player can interact with the environment in almost any way desired. Depending on the type of interaction, the character may be kicked, pushed, pushed or pulled, or otherwise manipulated within the space. Importantly, the player character has an unlimited number of interactions in any given location. The player controls the character and defines his or her interactions with the surrounding environment. The goal of the game is to explore all areas of the environment. In FRSite's official description: "Fringe Science is a virtual reality experience where the player is invited to explore the environs of a research facility. Within this game, the player can manipulate the physical environment. Where and how the environment is manipulated depends on the type of interaction desired by the player. Importantly, the player has an unlimited number of interactions in any given location. The character's movements and interactions may be affected by a variety of factors, including the player's own state of mind, skill, and desire." :: Observations on Hypersexuality Introduction (translated by the author): We all live through our sexual phase in happiness and sadness. For some, the sadness and depression are considerable, and for others they can even be deep. In all this, women are always at the gates of onanism, since they are the ones who maintain the first lines of unhappy love. Among the complainers and those who try to protect himself from love, hypersexuality of women is not strange. Even if most studies have shown that it is women who are more prone to onanism, the truth is that hypersexuality is a male problem. While women do not engage in so much "bleaching" as men, we face another type of personal attack in the sexual phase, onanism. For most women, the first time is also a traumatic or moving time. My purpose in writing this book is to warn all those victims of human misery and to save them from sexual sufferings. Whether women are anti social, depressed, suffering from disappointment in their love, the love of their lover, or are hypersexual. It's time to change our lives so that we can lead a better. We will start first with some definitions. Definition: Sexual phase: It includes the erotic stimulation in both senses of love and sex and the general physiological state of the organism that prepares for the production and secretion of sexual and reproductive fluids. Onanism: Onanism is an antonym of masturbation, the aim is to cleanse oneself

between manifestations of sex, without sexual pleasure. The term derives from the Latin word for wash, onus, and the Greek verbs para meaning "against and parama meaning "deeper." Hypersexualism: can be understood as that which involves excessive sexual expression that can turn into a problem, which brings tensions, pain, and other sensations to the person, which in this case is a woman. Observation Most women need to be very careful when it comes to finding someone new and not that they stop being active in one type of relationship (personality, religion, live, etc.), or lose love, or leave, or they turn against their partner, or their side partner, or whatever the reality may be. Many women realize that their lover either due to the fact that they are very active with the visit, or that they put up a wall or do not appear to try to understand their reasons. If we change
