She's a pre-kindergarten teacher for the village board and basically works as an unpaid receptionist for the doctors in the practice. I'd heard her neighbors annoyed with her for this. Anyway, we had a conversation and one of her biggest pet peeves is that all of her younger clients and their families use the word "a\*s." "A\*s," she repeats when I ask, "What's the harm in it? They're just kids." I actually have to agree. I'm not able to argue that it's a bad habit, that it's undermining the future of our nation, or that it's going to cause us problems in the future. Really, it's just a matter of her parenting choices. And, frankly, I don't think it's going to cause any problems at her school. It's just another excuse for Mom and Dad to let their kids keep it on a leash. So, though she has more authority to manage her children than most parents, in this instance I think she's a victim of her own success. I know that we wouldn't let little kids give stupid answers to tests. So why should we condone this kind of bad thinking? I guess, all things being equal, it doesn't really matter. Kids say things they don't mean, and mean things they didn't say. But, for whatever the reason, this one seems to really bother her. In her eyes, it's bad, even

## **What's new in Trainz 2019 DLC: Newcastle Shunter:**

**, Christmas! A year ago I picked up my first Canon G2 in Chicago. What's your favorite thing about the G2? You don't have to answer, I know what you're going to say. This camera might be new but it still has its quirks. The plastic might feel cheap and the battery might kick the crap out of you, but the G2 has a joke scene mode of sorts that is worth using every now and then and I think it speaks to many of the brand's strengths: its flexibility. Let me back up for a moment before I say anything. I recently got a digital camera for the first time in almost five years. And I'm having a great time exploring the G2's funny shit. Since I picked up the G2, I've become far more appreciative of small cameras. On a trip to New York City, I took a random photo with my iPhone — a wave on the beach of Manhattan at the south end of the**

island. What it lacks in photographic understanding it more than makes up for in charm and general awesomeness. Canon has always made cameras that look more fashionable than functional and a lot of people had the good sense to ditch them for the name brand. Canon missed a crucial memo, luckily enough. A Sony RX100 won the title of the most popular camera among photographers in the Consumer Electronics Show of 2014. I love Sony's cameras and I have been waiting for Canon's for a while; it's not like it would have been too big a leap, but it's nice to know that the brand I have been talking about for years on my photography forum has finally taken off. Is it though? None of the supposed improvements in the G2 over its predecessor have really reached a critical mass. As for the G2, I think people who have heard about its user-insertable memory cards (UICs) just don't understand why anyone would need them. They are complex, cumbersome to attach, impossible to flip out correctly, and have to be replaced after each picture or video you shoot. I bet some of the people who forget their cameras or fall into sand probably don't bother trying to replace them in their cameras either. Not only that, but they have to be changed regularly; I've lost three or four because the cheap G2 can't be trusted when it comes

if I play the game again? You will lose all progress you have made on your previous run and have to start again at the very beginning. Is there a time limit? There is no time limit. What happens if the sun is not aligned with the shadow? You will lose the shadow if the sun is not aligned with the shadow. You lose nothing if you play without knowing. Is the game hard to master? No, the game is not difficult to master. You may have less difficulty mastering the game if you can control the sun. Can I skip cutscenes? Yes, you can skip cutscenes.

**Screenshots Reviews Can't wait to try this game out!! 4**

**By JGawdz I bought this game for one thing: but what I find so far is that I absolutely love this game. I don't want to miss a second of it. I've only gotten to level 6 or 7, but the controls are fluid. The game play is addicting. If I got to level 10, I'd die of happiness. I'd love it if the developer added more levels after release. Amazing game 5**

**By I Got Knife Awesome game with a fun mechanic. The first time I played, I found myself playing it for several hours. Great work. It might be hard to complete 4**

**By irosbox It's not that hard but also to complete it. Super fun to play. 5**
