One of our most feature packed editions that has a lot of improvements and tweaks. The experience system has been overhauled and is now fully dynamic in any game session. The permadeath system works like crazy now. There is no way to defeat certain difficulty, but if you find a way to kill a PermaDead, you will see a replay of his last few moves and a good amount of loot. We added dice roll for critical hits. The changes have made critical hit rolls a lot more fun and realistic. We have also added turn based combat, so you can try new combinations. You can see our previous thoughts about how the changes affected us, our players and our rating. One of the biggest additions is the victory conditions. You can now choose what to win, that is, if you succeed in destroying an enemy or you are the last enemy standing. You can take other objectives such as points, gold, different kinds of loot or just save your game. This edition also has a significant amount of bug fixes. Depraved is a “snarky strategy game” about collecting loot, capturing precious resources and going on quests. It’s set in a magical world where great powers struggle to establish dominion. Depraved is part of the Lost Lands universe, which includes A) Tesseract, B) Maize and C) Kittyhawk. Only certain characters can see the world of Depraved, which is how I came to play it and everyone else is playing Maize and Kittyhawk. I like the art style, it feels like a steampunkish fantasy setting, and the music fits well with the whole atmosphere. Anyway, the game is unique. It’s probably the most unique game I’ve played since Transistor came out. You are a very naive villager who gets captured by baddies. You fight your way out of the prison and are still surrounded by enemies. You run around collecting items to gain the trust of the crew and gain the trust of the crew so you can reach the two final bosses. Meanwhile people are trying to kill you. Your enemies can attack you from behind, in front, and behind again, so there’s nowhere to run. As far as combat goes, this is a bit of a weird game. There are two main weapons: Light and Heavy. Light weapons don’t hit back, and Heavy weapons do but only shoot one bullet for every person in a certain zone. Heavy weapons move slower, so they are more powerful but it feels like you can’t attack that way. Then, there are other weapons like lasers that can hit a single target or crowds of people, sort of like a bombing attack that can target multiple groups of enemies at the same time. Gameplay: The gameplay is pretty fun. I found it a bit difficult to get used to the way that everything works. It’s basically like a choose your own adventure book where you gather resources and find weird puzzles that require you to collect certain things and then battle evil bosses. You have to watch out for traps, though, because some of them are pretty clever. For example, you may find some platforms that allow you to jump into another area. But if they get destroyed, you will fall into a void, and you cannot jump up those platforms or find anything you’d need on the way down, so you may fall and die. The puzzles, and the bosses, are both well-designed. Occasionally, you will encounter a
