You can also use it to jailbreak your device. A: You can use multiple stickers to make it work. Here is a list of stickers: A: If you have spotify installed on your computer, you can make a shortcut to the spotify directory on your desktop and when you launch it from your desktop, a menu will show up. Some wrote discs fine, but when I tried playing them in a DVD player, I got sound and no video. I found a new way. (See Update 3, below, for a way to write a disc that works in DVD players too.) Blank DVD Disc, I used Nero Express and the MakeISO DVD burning tool from Bero.com. The DVD writer that comes with Nero Express is very good. It can create discs that will work in any DVD player, but it's not the most reliable program to use. Nero Express is available for free if you want to try it out, but you have to pay for the full version if you want to use the most features. MakeISO is also a good program. It was free for the first month that I used it. After a month of updating the software, it cost \$14.95 to continue using it. The MakeISO program can also burn ISO images to blank discs. They won't play in DVD players, but they will play in CD players, computers, and portable devices. You can convert any ISO image you have to a DVD image that will play in DVD players and then
