Since its initial release, AutoCAD has undergone many major revisions, including major system software releases (e.g. 3.0, 2000, R16), and minor feature upgrades (e.g. 2.7, 2002). The first desktop AutoCAD program ran on a System/370 architecture CPU, and later was ported to the CRAY, VAX, and PDP-11 operating systems, which ran on mainframes and minicomputers. AutoCAD's second major revision was AutoCAD 2000, which introduced Windows-based graphical user interface (GUI). The 2002 AutoCAD release featured many major enhancements, including AutoCAD WS, a Web Services-based version, and R5H. The latest release is AutoCAD 2010 (formerly AutoCAD R14), which was released in January 2010. As of October 2012, approximately 4.2 million AutoCAD users were registered with Autodesk, and approximately 25 million AutoCAD files had been created. AutoCAD is regarded as the most popular CAD program of its generation. However, it has been outperformed by several newer CAD applications. It is estimated that, as of 2013, AutoCAD is used by about 4 million people, making it the most used CAD application of any generation. History AutoCAD 1.0 AutoCAD 1.0 was released in February 1992. It was the first application in the AutoCAD application portfolio and was developed by Brunel Design Technology (BDT), a division of Symbol Technologies. At the time, the first release of AutoCAD was not as a part of the commercial application suite of products from BDT and it was considered more of a beta product than the Autodesk Suite of products that have since become dominant in the industry. As its first release, AutoCAD was developed for the Apple II, Atari ST, Commodore 64, and DOS operating systems. It was initially distributed as a shareware product and it could be used for educational purposes. AutoCAD 1.0 was written in assembly language. The code was written by David M. Boggs, who was an engineer at BDT at the time. Prior to writing the application, he was an instructor at the Midland College in Midland, Michigan. The first release of AutoCAD for DOS was based on the HyperCAD application which was the product that was made by BDT for the Atari ST platform. It was a major upgrade and the initial release in DOS with AutoCAD was based on a codebase that was much smaller than the first release of AutoCAD. Later, in 1995, it was followed by AutoCAD 2.1 (the second version 1.x). Release history AutoCAD 2.0 (March 1993) was the first version of AutoCAD that supported both the DOS and Macintosh operating systems. AutoCAD 2.1 AutoCAD 2.1 was released in 1995.
