Kaiju AGE is a Sci-Fi™ strategy game set in a massive futuristic solar system where factions vie for control of the last vestiges of the Earth. Deplore the secrets of deep space, as you explore an awe-inspiring universe of opportunities and dangers. Create your own character, determine your own faction, then lead your growing numbers into combat against a seemingly endless array of galactic creatures. Player's Guide: Dialogue from podcast about unit designs, AI and the Future of Kaiju AGE ***To give feedback or report an issue, please visit our Support Page at *** Topics: 1. Unit designs 2. AI 3. The future of Kaiju AGE Directions. The Mission of Kaiju AGE Kaiju AGE Mission Statement: Our intention is to create an epic strategy game that has a deep respect for its heritage. We want to build a game that fans of Paradox, Stellaris, and Europa Universalis will love, and which will stand on its own as a fantastic game on its own. We are using the Unreal Engine to build an amazing world that lets us go beyond the limits of a turn-based and isometric system, for epic space battles between star fleets and gigantic Kaiju. The goal of the development team is to create a Kaiju game that knows that the Kaiju are a major part of the universe. One with depth and sophistication that has been rarely explored. One that could rival the real Kaiju of the 60s and 70s or the ones in Legendary Pictures' Godzilla movies. A giant that flies and a giant that hunts and eats people. A Kaiju game that is epic in scope and scale and action. As the Kaiju are a part of the universe and a part of your goals, we want the Kaiju to have unique abilities, pros and cons, and playstyles. There will be nameless Kaiju, Kaiju with full names, minions and allies, Kaiju with unique traits and features. We want to focus on Kaiju for two reasons. 1. Kaiju are Awesome. Why do you need a build engine that can handle the biggest, most diverse universe? Our sole goal is to make your Kaiju beautiful and c9d1549cdd
