Four major innovations have been introduced to football through HyperMotion Technology: Quick Free Kicks – Focusing on the pass and the defense’s challenge, the players will be able to kick the ball with an extra movement advantage – directly aiming at the target when the approach foot is no longer on the ground. This new feature will provide an advantage in the quick free kicks play, as it’s never been easier to freely move your leg back and forth for shots. Quick Free Shots – When the ball is struck by the player’s foot during the run up to the shot, it will fly in a long and high trajectory. The ball will travel even higher and further when the player is not affected by the defender’s challenge. This will add a new dimension to attacking maneuvers. Quick Penalty Kicks – Inspired by quick free kicks, the player will be able to kick the ball with an extra movement advantage – directly aiming at the goal when the approach foot is no longer on the ground. Quick penalty kicks will be more accurate thanks to the player’s movement advantage when the ball is struck and while the player is still in motion. Journeyman Players – FIFA world class players can still use their signature skills to inspire others in FIFA. Journeyman players will be able to control three players on the pitch at once. This will allow journeyman players to pass the ball off to those who have skill and creativity. Here’s a first look at all four innovations: Quick Free Kicks Quick Free Kicks is a feature that allows players to kick the ball from any direction while continuing to move. The advantage of this feature is that now the players will no longer need to move back and forth to free their leg and it will all be done in one go. A complete pass is guaranteed as long as the player is moving forward and the move is done after a challenge or shot. If the pass is successful, the opponent will not be able to challenge, challenge or tackle the ball. Only one defender can tackle the player as he or she is in motion and will tackle him or her from behind. There will be no kicking the ball when the player has already won possession. In this case, a new kick button will appear to replace the last kick. The player will be able to choose the new kick direction to continue the play. Quick Free Shots Quick Free Shots will increase attacking maneuvers
