Q: BigQuery: ADMIN_USE_RESERVED_QUERY_TOKEN, migrate to reserved token are not working in firebase hosting I am using firebase hosting with bigquery enabled. I have configured the URL to bigquery to use my credentials: I have revoked the old token as shown in the Google documentation: curl -X "DELETE" -H "Content-Type: application/json" \ -d '{ "cryptoKeyVersion": { "name": "beta1" } }' Error: { "error": { "code": 400, "message": "Bad Request: Cannot delete a crypto key if the key is being used in a query (auth mismatch)." } } I have also tried to migrate the existing reserved query token but it gives the same error. Question: Is there any way to migrate the existing reserved query tokens? How can I get the List of existing query tokens? A: Currently, there is no way to migrate those reserved query tokens. Please, create a new BigQuery Project and then the reserved d0c515b9f4

You can download the link below to Fullastro any problem and support fullastro.com. Now i give you the good news for you, Fullastro download link is ready. fullastro.com is a professional software website to download. i will like to share a screen shot of the software (step by step) who download from this website. PS. you need to download an authorized application for this screen shot software.2. An entry in the In the Line of Duty Contest – Marlon Walker 1. Loose Cannon – Garrett Marlon Walker, who was found not guilty at the last hearing of the insanity defense that has gripped him since the slaying of his father, was quickly granted bail by the same judge who admitted him to a psychiatric facility. 2. Scott and Sarah – Bonner County officials say they believe that two people killed a goat and ate part of it Saturday at a residence in rural Bonner County. Scott and Sarah Woldt of St. Maries are seen in an undeveloped area of the county, the where one of their goats wandered. The Woldts' neighbor also raises goats, but there was no indication that the goat was from the
