Debris Infinity is an arcade action game that puts your reflexes to the limit. Manage time to slow down or speed up time to manipulate the environment and play your way to the top of the leaderboards. Play with full intensity or calmly as you are rewarded for precision and accuracy. But don't let your victory be easy! The campaign is a test of skill but be aware that your reflexes and brainpower can be the factor that will determine the outcome of an intense battle! Debris Infinity allows you to use time like a valuable resource that you must control wisely. If you are not careful, collisions can cost you valuable seconds that could be worth hundreds of points, and also be an element of failure that could deduct points from your total. Be alert and use your shield wisely. More time is needed to gather up your energy, so use it wisely! Although there is no final boss, the game is full of new challenges and more enemies to destroy. Face the challenge of a singleplayer campaign or battle it out with a friend in multiplayer mode. This is no easy task, and you'll need all your brainpower to deal with the challenges that you are going to face.

What's new:

Summary: So, according to what I've heard, Coldplay's new album is nothing like how it sounds on my speakers. Which means, that this artist hasn't given a single lousy tune that I love from the new album. But, based on all the other songs that I love, it's certain that they were the most good ones that they had to include in this album. Therefore, if my judgment is correct, this couldn't be a particularly good, first record of this modern-day. On the other hand, I've heard some of the album tracks in a public test during a concert and I've liked 'em. However, I'm fairly sure that what I've heard was played in full volume instead of the low volume setting I've got. Therefore, they may have sounded somewhat better in the songs in question. Maybe. Who knows, right? Well, I don't. I've heard this album in a public test, too, which was performed during the band's concert. However, I wouldn't doubt that a lot of CD players have a louder setting (I mean, movies on Star Trek have a loud setting, too). Nevertheless, because I've heard Coldplay's new album in two different testings, which were performed in different places, 'n different conditions, one of which is a whole lot louder than the other of which is just barely loud enough, I could get the idea that there could be some bad ones, too. However, I already kind of know the real deal from the listening I've done. Having said that, I still haven't seen them at a live concert, which means that every single song could play much better. So, there's always that. Just to make sure I won't be disappointed. Would you like to check out my full review? It isn't anything that I actually like to hear in songs of this kind... It's annoying, and I really don't like it. (maybe it's just me) At least I knew what Coldplay were up to because the title track is more like a pop song, a ballad, but not exactly that. Mmmmm. And then I heard the song saying # something or something. I'm really not sure, but it sounds familiar. I will definitely listen again to the song. (Summer Outlaw) Back in May, in the 2010 Popsung Idol, I listed my band's new albums. If that's who Coldplay is, then they had better

Grisaia Phantom Trigger is an independent visual novel developed by Elements Garden, published by TokyoPop and released in Japan on May 15, 2006. The story is about Sadaharu and Suzu, two elementary school students who meet after Sadaharu breaks up with his girlfriend. The pair are then transported back in time to a medieval Japanese village. In the village Suzu becomes "Phantom", an assassin who must kill a certain number of people. One day, Sadaharu is assaulted by Suzu's Phantom, and gets transferred to a virtual reality simulation of a medieval village to aid him in his quest. In addition, the game's setting is part of a large series of visual novels called Koihime Musō. About the music: "Edge Of My World" is an opening and ending theme, composed by Hitoshi Fujima. He is a Japanese composer with a sound that is reminiscent of the guitar. The track is based on a folk song that is sung in Kyoto with a relatively minor key, and the melody of the song is sung in a compelling manner. The song is one of three tracks that can be used as replacement music while playing the game. "Edge Of My World" is arranged by Hitoshi Fujima. The song is definitely suitable for playing during this game. "A Simple Wish" is also an opening and ending theme, composed by Yuu. The song is in the koto genre, which is a Japanese musical instrument which was established in the Muromachi Period (1336 - 1573). Koto music emphasizes various genres of music. The track is based on a folk song that is in a minor key. This track is probably effective for listening at night while the game is running. "A Simple Wish" is also arranged by Yuu. "Edge Of My World" and "A Simple Wish" were originally composed by Elements Garden for another game. Additionally, elements garden released both of the tracks as separate singles. The main characters of the game are "Sadaharu" and "Suzu". Their songs are named "Edge Of My World" and "A Simple Wish", respectively. Marina Kawano is the female vocalist for "Edge Of My World". Hiromi Sato is the female vocalist for "A Simple Wish". Original Soundtrack Bestselling Indie Game (Grisaia Phantom Trigger) - Japanese OST in High Resolution (WAV & FLAC)
