0..Q: How to properly enter a Time.now.utc into the Google calendar? I'm writing a scheduling application, and I'm converting the current time into UTC for a range of entities in my application. For my user account, I'm using the Google Calendar API, which is handled by Ruby on Rails. I am able to successfully enter dates and times into my Google calendar. However, when I try to use the Time.now.utc method, I get the following error: /Users/space/.rvm/gems/ruby-1.9.3-p194@configurac ao/gems/google_api-1.14.0/lib/google/api_client.rb:198:in `current_api': there is no current API client for API 'calendar.googleapis.com', but you are currently accessing the API for API 'analytics.googleapis.com (Google Analytics)'. (Google::APIError) from /Users/space/.rvm/gems/ruby-
