Version history The first release of AutoCAD was "AutoCAD Version 2.0". AutoCAD was originally based on LabVIEW. AutoCAD 2.0 provided the first true CAD application. It was an application-based CAD system rather than a drawing-based CAD system. AutoCAD 2.0 was a small, incremental release that introduced the first comprehensive modern scripting language and improved the user interface. AutoCAD 3.0 was released in 1995 and was the first AutoCAD release to be backwards compatible with AutoCAD 2.0. It introduced the first of the following major revisions to the product. AutoCAD 2.5 (1995) AutoCAD 3.5 (1997) AutoCAD 4.0 (1999) AutoCAD Architecture (2002) AutoCAD Electrical (2002) AutoCAD Civil 3D (2007) AutoCAD Graphics (2009) AutoCAD 2002 introduced the AutoCAD 360 Design Suite. AutoCAD Architecture and AutoCAD Electrical are both considered "web-enabled" products. AutoCAD 3D Civil, and AutoCAD Graphics were also Web-enabled. In 2010, the number of features available in AutoCAD Architecture increased dramatically. AutoCAD 2011 introduced new features such as technical drawing tools (trimming, texturizing, layering), which was then expanded upon in AutoCAD 2012. AutoCAD 2013 was the first release of AutoCAD to be available as a licensed software only version. AutoCAD 2014 was the first release of AutoCAD that included maintenance updates and covered the Windows 8.1 and Windows 7 operating systems. AutoCAD 2015 introduced a user-interface redesign and introduced the concept of an Installed Base. AutoCAD 2016 introduced mobile apps for iOS and Android. AutoCAD 2017 was the first release of AutoCAD to require a minimum operating system. AutoCAD 2018 was the first release of AutoCAD to require a Windows 10 operating system and used the Windows 10 Operating System as a core development platform. AutoCAD 2019 introduced an Application Programming Interface (API) called AutoCAD Web API, which allows developers to create an application that integrates with AutoCAD using web services and web technologies, including Javascript, Java, Python, PHP and .NET. This API is based on the Autodesk Exchange APIs, and is available on the Microsoft Azure Marketplace. The af5dca3d97
