Bernie Sanders. An explosive device was discovered on the floor of a San Diego synagogue on Thursday, San Diego police announced. Officials found what appeared to be a pipe bomb on the floor of the Chabad of Poway Synagogue in San Diego. The device was addressed to Sen. Bernie Sanders. The suspect, James T. Hodgkinson, of Belleville, Illinois, died from gunshot wounds to the chest after a shootout with police early Wednesday morning, according to the Washington Post. Hodgkinson had a history of mental illness. Police found the package, which was addressed to "Bernie Sanders," after Hodgkinson fired rounds from his rifle on a state lawmaker, who was not seriously injured. Hodgkinson's social media accounts show him to be a fervent supporter of Sanders and an outspoken critic of President Donald Trump. The FBI confirmed that a package addressed to Sanders was delivered to a facility in San Diego but said the device was not explosive and was "being taken to the FBI for further analysis." Some residents of the city of Poway reported receiving calls to their cellphones, according to the San Diego Union-Tribune. San Diego Mayor Kevin Faulconer said in a tweet that city officials have been notified and "out of an abundance of caution, we are taking immediate precautions to ensure the safety of our residents and visitors." "San Diego is a city of tolerance and diversity that embraces all," he tweeted. "We will not be intimidated and we will not be deterred." "Anyone who comes to our city and threatens our people, or our way of life, or our values, or our way of life — they should be shocked and offended by that. They should be shamed and embarrassed," San Diego County Sheriff Bill Af5dca3d97

A new file has to be created. A new folder should be created as this is the working directory of the Autocad and the screenshot maker. In this case it would be: C:\Users\username\Desktop\Screenshot Maker\Screenshot Maker 2\Autocad Copying the folder Edit the file C:\Users\username\Desktop\Screenshot Maker\Screenshot Maker 2\Autocad\Screenshots.bat In this case the line of interest for your screenshot maker is: '@echo on copy C:\Users\username\Desktop\Screenshot Maker\Screenshot Maker 2\Screenshot Maker\Screenshots\%%*%n' D:\Screenshots Save the file How to use the Screenshot Maker For this instruction I made up a working directory at the location D:\Users\username\Desktop\Screenshot Maker\Screenshot Maker 2\Screenshots. You can make up the directory you like. Create a new directory at D:\Users\username\Desktop\Screenshot Maker\Screenshot Maker 2\Screenshots. In the new directory you should see 4 files. screenshot_icon.png screenshot_icon.ico screenshot_icon.pdb ScreenshotMaker.exe The screenshot_icon.png and the screenshot_icon.ico files are the icons and the screenshot_icon.pdb is the icon of the program that is to be copied. The best way to use the screenshot maker is to use the batch script. This has the benefit that you can specify the caption and save the ScreenshotMaker.exe itself in the same location as the batch script. It will be easy to copy this ScreenshotMaker.exe to a different location for easy access if needed. Steps 1 Start up a new instance of Autocad as if it was the first time Autocad was started. If you are in the middle of a batch script with the screenshot maker running then don't start up Autocad. Steps 2 Activate the program to use. Steps 3 Open the ScreenshotMaker.exe Steps 4 In the ScreenshotMaker.exe select the program you want to screenshot. In this example it is AutoCAD. In the screenshot the icon, the name, and the caption can be changed. Steps 5 If you don't see the 'Open file' button then you need to enable
