3D printing 3D printers are also called additive manufacturing (AM) machines and they are used for the creation of 3D designs from a digital model. The first commercially available CAD/CAM software for 3D printing is from 3D Systems (now part of Autodesk). 3D Systems sells its software in two forms. The first is a 'plug-in' type product which consists of a software application and an optional 3D printer driver. The second form is the fully integrated 3D CAD/CAM system which is sold bundled with the appropriate 3D printer. Autodesk's FormZONE offers a service for manufacturing firms that uses a 3D printer to create products based on a 3D design created in a 3D CAD/CAM system. The firm claims that the 3D printed design can be created in as little as 12 hours. Other uses Autodesk has developed CAD software that can be used for many non-CAD uses. These include designing house plans, animations and fluid dynamics simulations. AutoCAD Free Downloadeveloper AutoCAD's AutoCADeveloper, later developed and marketed

by Autodesk and now sold as Autodesk Tech4me, is software that allows developers to create applications for Autodesk's CAD systems for use on the desktop. Unlike with AutoCAD, the AutoCADeveloper software is self-contained. It uses a plug-in architecture, where one plug-in can be used to develop an application for multiple CAD systems (including AutoCAD, AutoCAD LT, AutoCAD LT for Win64, or AutoCAD Civil 3D), but does not support the creation of a single cross-platform application which can be used on multiple CAD systems. AutoCADeveloper is available in a subscription version, as a freeware version, or in an academic version. The subscription version is available for Windows and OS X, or through various monthly or annual licensing options. Designer In 2013, Autodesk announced a new professional CAD software application called Designer, designed for digital designers to "automate the entire design process, from concept through creation and implementation". Designer is based on the same underlying code as AutoCAD, and can be purchased separately from AutoCAD or bundled with AutoCAD as AutoCAD 2014. Designer is an integrated work environment, as opposed to a standalone CAD product. The goal of the Designer af5dca3d97

My application will be installed in a multi-user environment. I have a C# web application which uses IHttpHandler to handle.html file extensions. It reads in a file, does some processing on it, and returns a result. I want to be sure that no two instances of my application can simultaneously handle a request for a given file. How can I accomplish this
