The new product launch comes at a time when the global guitar world is in turmoil.. Advise against the use of any software tools other than Guitar Pro 5.. Vista e il 16, scaderemo il 31,33.Q: trigger changes in php variable - on document ready I have a variable that I want to change to 1 when I load a page, but it needs to trigger an event before it can change. I have triggers the change here"> and should work, but I get the error Parse error: syntax error, unexpected '=' A: As you've said, it's more likely you want a better way to trigger the update you're looking for. You could have a javascript function run that updates \$zwei, but in my mind that feels slightly dirty - as if that function just belongs in the page itself. If you are looking for something that's cleaner and produces no page overhead, you could have a view do your processing, and then you use a view variable to access that variable - which you can then output with html that allows page visibility. Some pseudocode: 6d1f23a050
