
BLOCKADE Classic [hack] [UPDATED]

Q: Why do we cheat? A: Novalink are code thieves, BLOCKADE Classic is not their game, it is made from stolen code from another Unity game (former Blockpost) or ... from code written by Novalink. We are very serious about BLOCKADE Classic. We would like all BLOCKADE Classic players to know that this is not really our game. We consider this dishonest. Q: What about Novalink? A: Novalink is not a game, it's just a hacker. He was a very talented cracker and I really respect him. But in reality, no. All he did was steal the code. And if we wrote such a game, I would consider it my own. I would do anything to make it mine.
