You can watch this movie on disc, DVD, Blu-ray, or streaming it from.1. Field of the Invention The present invention is generally directed to a liquid crystal display device, and more particularly, to a reflection type liquid crystal display device which is operable by a linearly polarized light. 2. Description of the Related Art In a reflection type liquid crystal display device, incident light irradiated from the exterior is modulated by a liquid crystal layer and reflected from a reflection plate, and thus images are display. Such a reflection type liquid crystal display device is low in power consumption as compared with a transmission type liquid crystal display device. Therefore, such a reflection type liquid crystal display device is appropriate for use as a display section for personal digital assistants (PDA) and digital cameras, and a small-sized liquid crystal display devices for AV apparatuses, car navigation systems, portable game consoles, and so on. In the case of a reflection type liquid crystal display device, however, the quantity of light reflected from a reflection plate is reduced at a boundary region between a liquid crystal cell and a reflection plate or between a liquid crystal cell and an adjacent liquid crystal cell. That is, the light reflected from the boundary region c6a93da74d
