A training camp was built in what was formerly Chiba Prefecture to house captured American soldiers and American soldiers serving in the Japanese army. They were trained, like the Japanese fighters, in the art of survival.

It is the lowest part of the midbrain and continues as the pons that is attached to the medulla. It contains the medulla oblongata proper, which is divisible into an inferior portion (below the pons) and a superior portion (above the pons), the inferior and superior colliculi. The medulla oblongata contains the corticospinal tracts, the reticulospinal tracts, and the ascending pathways of the spinal cord. Structure The medulla oblongata is a part of the brainstem, or medulla. It extends from the level of the pons to the midbrain. The majority of the deep nuclei of the medulla oblongata are the motor nuclei (pons), which are located between the medulla oblongata and the pons. The pons in turn is c6a93da74d
