Expression and subcellular localization of annexin A2 in rat taste buds. Annexin A2 is a 37-kDa calcium- and phospholipid-binding protein. In this study, we identified annexin A2 immunoreactivity in rat taste buds, and investigated whether annexin A2 plays a role in presynaptic vesicle storage. Using an annexin A2 monoclonal antibody, annexin A2 immunoreactivity was found in taste bud cells. The immunoreactive punctate patterns seen in the cytoplasm of cultured rat fungiform taste bud cells resembled those seen for synapsin and syntaxin 1A. In situ hybridization histochemistry revealed extensive annexin A2 mRNA expression in taste buds. During development, annexin A2 immunoreactivity in taste buds increased from birth. At 3 days of age, annexin A2 immunoreactivity was mainly localized in the cytoplasm of the apical endfeet of the taste bud cells. These findings show that annexin A2 is localized in presynaptic terminals in developing taste buds.

Re: Ben Walker, Composer in Residence, Bradford University This is a discussion on Re: Ben Walker, Composer in Residence, Bradford University within the AER forums, part of the Performing Arts category; I'm adding this line just to make sure people know that Ben Walker is more than just a BBC favourite. His recent appearance in Bradford... Re: Ben Walker, Composer in Residence, Bradford University I'm adding this line just to make sure people know that Ben Walker is more than just a BBC favourite. His recent appearance in Bradford was billed as the first performance of Wallace Green's Quiet Music (1971) (from On the Way to the End of the Night). The work comprises a simple repeated viola arpeggio, initially quietly and harmoniously played, but later gradually increasing in volume, and finally a frantic rush of ringing broken chords. This is what Ben Walker does best: he creates wonderful new music using one instrument, that drifts through simple harmonies, but whose truth and intensity seems impossible to define until the very end. He is also founder of Resound, a series of concerts in which improvisational and traditional music are played with acoustic instruments.

Incidentally, a good friend of mine is a part-time violinist and a c6a93da74d
